<b>Office Action Summary</b>	<b>Application No.</b> 10/552,717	<b>Applicant(s)</b> TANGHOJ, ALLAN	
	<b>Examiner</b> DEANNA K. HALL	<b>Art Unit</b> 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Receipt is acknowledged of the preliminary amendment deleting the multiple dependency of claims 3-4 and 6-9.

#### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Information Disclosure Statement***

3. The information disclosure statement (IDS) submitted on July 27, 2006 is in compliance with the provisions of 37 CFR 1.97(b). Accordingly, the IDS is being considered by the Examiner.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. **Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanghoj et al. (US 2003/0018293) (“Tanghoj”).**

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Tanghoj discloses: a catheter assembly comprising a container 46 and at least one catheter element 42 with a proximal end adapted for insertion into the urinary canal and an opposite distal end, the container 46 comprising a cavity 48 adapted to accommodate at least a proximal section of said catheter element, said catheter assembly further comprising a catheter handle 44 adapted to be interlocked with said catheter element, the handle 44 comprising a sleeve section adapted to surround a portion of said container characterized in that the handle is further adapted to be separated from the catheter element and from the container, Fig. 15.

The catheter handle 44 is attached to said container assembly and is shorter than said container or shorter than said catheter element, Figs. 15-16.

The distal section of the catheter element has at least one protruding part and the proximal compartment of the cavity has a distal opening zone with a radially inwardly extending exclusion means adapted to exclude the distal section of the catheter element from entering the proximal compartment [0094].

At least a part of the distal opening zone is flexible [0030] [0032].

The catheter assembly further comprises a lubricating medium, a hydrophilic coating [0026] and sealing means 50 for sealing the cavity. [0046]
